

## ZT803 ELECTRO MAGNETIC FLOW METER

### Introduction

Ztek's Electromagnetic flow meter model ZT803 is designed for flow measurement of conductive liquids with no moving parts and a PTFE lining. Electromagnetic flow meter is suitable for measurement of flow of conductive liquids, which is based on Faraday's law of Electromagnetic induction, according to which a voltage is induced in electrically conducting body moving in a magnetic field & this voltage is directly proportional to the velocity. Standard outputs include analog, frequency, RS232/RS485 or GSM/GPRS connectivity. Local-and remote-display models are available with weather proof & flame proof enclosure as an optional feature. They meet the most demanding requirements on high measurement precision, long-term stability and hygienic standard.

## Installation Guideline

Flow Must be Full Bore

Strait Pipe: Up Stream(10 Pipe Diameter),Down Stream (5Pipe Diameter)

Install the Flow Meter Vertically or Incline With Flow from Down To Up As This Ensure That the Pipe Is Always Full

Proper Grounding/Farthing to Flanges is Compulsory

Use Proper Wire and Proper Glanding will avoid from External Environment Parameter like (Water, Dust, Gases)

For Communication use Shielded core twisted pair wire only

## Groundwater Monitoring & Management Telemetry System As Per CGWA Guidelines

TM

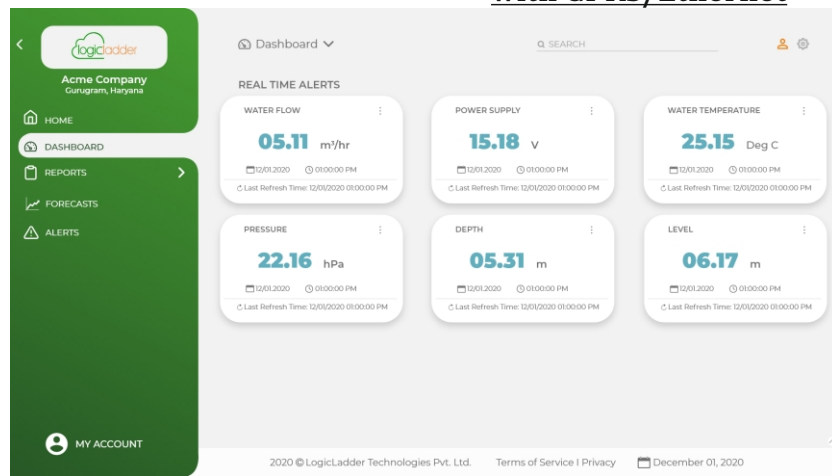

**Ground Water Parameter  
Telemetry System Gateway  
with GPRS/Ethernet**

**Level Transmitter  
(Piezo Meter)**

**(Flow Meter)**

**Ground Water Parameter Telemetry System Cloud**

Dear Sir/Madam,

This is to inform you that, The Gazette of India dated 24-Sep-2020 mandates all industries to have a telemetry system for monitoring groundwater level and extraction, as per NOC terms. Being a pioneer into telemetry systems, LogicLadder can help you with this.

The following is included in the System

1. GPRS IoT cloud connector / Modem "LogicLadder STD ADV V5.00.00.0".
2. Cloud Telemetry system annual subscription.
3. Remote offsite support Monday to Friday via <https://support.logicladder.com>.

Customer Scope:

1. All the Flowmeters, level transmitter in working condition.
2. RS485 interface available on the Flowmeter and 4-20ma interface available on the level transmitter.
3. Internet Connectivity to IoT Cloud Connector via GPRS SIM card, Wi-Fi or LAN.
4. UPS Power Supply to IoT Cloud Connector.
5. Installation of Cloud Connector. LogicLadder team would only support remotely.
6. A copy of NOC and other documentation required for CGWA compliances would be provided to LogicLadder backend team.

## OUR MISSION

The world is in an environmental crisis. It has a grave impact on our health and existence. It is threatening our air, water, soil, climate, and the entire ecological system. If we carry on like this we would be in a deep crisis soon. We still have the time to change this. Net Zero is one such change. Let's get it right now.

Net Zero is not just a vision but a responsibility to reduce our environmental footprint of emissions, pollutants, water use, and waste. Enterprises and governments are managing and achieving Net Zero with our software platform "The Sustainability Cloud".

*We stand for our planet by making Net Zero possible for our enterprise customers.*
